

Planning application comment was submitted on the **08 October 2023 14:06 PM**

The following is a comment on application **P222728/N** by **Marie Stephens**

Nature of feedback: Objecting to the application

Comment: I strongly object to the development of this huge industrial anaerobic digester, far from an agricultural development instead a waste management plant (Planning policy states such a development should be on a site/sites allocated in the Local Plan.

The increase in traffic will have a detrimental impact on the local community, in particular, there are already so many dangerous incidents frequently occurring locally so with such a significant increase due to this development with huge lorries coming and going ever ten minutes or so it is going to be disastrous.

The increase in air pollution that this site would cause is massively concerning, local young children playing in their gardens or attending our local nurseries, childminders and schools should not be exposed to such unnecessary levels.

Ammonia pollution must also be considered, ammonia concentrations are already alarmingly over 2.5 times the harmful level. The damage that the pollution from this site will cause to our biodiversity and water sources, including the Wye will be irreversible.
