Subject: RE: 150509

Dear Roland

To clarify my comments relating to the future management of the translocated grassland being managed under a 106 agreement, I reflect the suggestions of the ecological report which relates as such. I have requested that a condition is put in place to require this translocation. I would not be requiring the formulation of a 106 agreement for this; the condition to follow the ecologist's recommendations should be sufficient.

Regards

Rob
