Subject: FW: Transport Route for Application P161777/F - Barrow Farm, 16,000 Bird Egg Production Unit

Dear Claire,

Please find attached an email that I received from a local resident yesterday regarding the application. You will see that it refers to my pre-application response to you and the lack of detail regarding the proposed transport route in the application.

I think that the application should be supported by a Transport Statement and should include the details of the route that you submitted at pre-application stage. Would therefore be grateful if you could address this and provide the requisite information. It would also be useful if you could give me a timeframe for this.

I have also received comments from Pembridge Parish Council. They met earlier this week and have given their support to the application.

I thank you for your attention in this matter and look forward to hearing from you in due course.

Kind regards

Andrew

Andrew Banks

Subject: Transport Route for Application P161777/F - Barrow Farm, 16,000 Bird Egg Production Unit

Dear Mr Banks,

I am looking to get hold of the proposed transport route for lorries/vehicles for the proposed 16,000 egg production unit that is currently in for Planning at Barrow Farm, Bearwood, HR6 9EQ. Planning Ref P161777/F.

We live on the lane that the farm access is on and we have some concerns over the size of vehicles that will be using the lane, considering it is a single track highway with a 90 degree

turn at the one end. We don't believe a 16.5m long and 2.55m wide 44 tonne lorry can safely use this access without hindering other road users or residents.

No mention is made of the type and volume of transport to and from site in the application, other than in your Pre App response.

This is not a formal comment/objection at this stage, as we would like to see the proposed transport route first.

Kind regards,
Miranda Jones
