Title: Site Access Proposals

Date: 20.03.20

Prepared By: James Corbett

Distribution List: Fisher German

Radclyffe House
66/68 Hagley Road
Edgbaston
Birmingham
West Midlands
B16 8PF

Background

- 1.1 Hub Transport Planning Ltd has been commissioned by Mrs P Simpson to provide transport advice for a new private drive access located off the B4221 in Upton Bishop. The site location is shown on **Figure 1.1**.
- 1.2 The site is located to the east of Upton Bishop and is bounded by the B4221 to the south, an existing dwelling to the west, an unnamed road connecting Upton Bishop to Upton Crews to the north and Chicory Farm to the east.
- 1.3 An existing property is located on the site and this currently shares access with Chicory Farm which can be accessed via a priority T-junction directly off the B4221. Access is also available from the unnamed road linking Upton Bishop with Upton Crews, this is also shared with the adjacent farm.
- 1.4 The proposal includes providing a new access directly off the B4221. The new access would be entirely separate from the existing farm access and would not be shared.

Proposed Access

- 1.5 **Drawing T19591.001** illustrates the proposed site access arrangements. This has been designed in line with Herefordshire Council's Highway Design Guide for New Developments. The single drive access has been shown as 3.2m wide, with a dropped kerb splay provided as it meets the B4221.
- 1.6 The visibility splays indicated on the drawing have been calculated based on recorded 85th percentile speeds in the vicinity of the access, in accordance with guidance set out in Manual for Streets 2 (MfS2). The speed data was based on two ATCs, located to the east and west of the proposed access. The visibility requirement to the east has been based on westbound speeds calculated from the eastern most ATC, whilst the visibility requirement to the west has been based on the eastbound speeds taken from the western most ATC.
- 1.7 The ATC to the east of the access was undertaken between the 6th and 14th November 2018, whilst the ATC to the west was undertaken between the 15th and 21st October 2019. The full ATC data is included in **Appendix A**.
- 1.8 The 85th percentile speeds have been calculated based on 24-hour flow data recorded across the week. Eastbound 85th percentile speeds on approach to the access were 35.4mph, whilst westbound speeds were 42.5mph. The resulting visibility requirements based on guidance set out in MfS2 are 113m to the east and 85m to the west. **Drawing T19591.001** indicate that these splays can be achieved at the access from a point 2.4m back from the carriageway. It should be noted that the visibility splays have been calculated using the desirable minimum deceleration rate in line for speeds over 60kph. For consistency the same deceleration

Technical Note

rate has been used for both directions even though the recorded eastbound speeds are below 60kph. This ensures the assessment is robust. The full speed and visibility calculations are contained in **Appendix B**.

Sustainable Transport Options

- 1.9 An existing footway is located directly opposite the proposed private drive access and this provides a link to bus stops and a local pub located within the village. Upton Bishop Millennium Hall is located on the southern side of the B4221, adjacent to the site.
- 1.10 The bus stops within the village are approximately 200m from the site. From here the number 32 service provides seven to eight services a day between Ross on Wye and Gloucester. The 457 bus provides one service per day between Newent and Hereford.

Traffic Impact

- 1.11 As the proposed private drive access arrangements are replacing like for like, the proposal will not result in an increase in traffic on the network. As a result, the development will not have any impact on the local highway network in terms of traffic queues or delays.

Conclusion

- 1.12 The National Planning Policy Framework (NPPF) states that:
“Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.”
- 1.13 Clearly, the revised access arrangements would not have a severe impact on the local network and safe and suitable access can be provided.

Appendix B – Visibility Calculations

Project Name B4112, Upton Bishop

Westbound - Wednesday 7th November - Tuesday 13th November 24hr Data

Eastbound - Tuesday 15th October - Monday 21st October 24hr Data

[illegible][illegible]

Project No T19591
Project Name B4112, Upton Bishop

MfS Visibility Calculation

ABOVE 60 KPH DESIGN/MEASURED SPEED

Para 10.1.5 MfS2

Westbound

Calculation Params		Speed Survey Result
v	18.90273	42.53115 mph
t	2	
d	2.45	
a	0 (gradient)	

SSD = 110.7 m **Vis required = 113.1 m**

Eastbound

Calculation Params		Speed Survey Result
v	15.74598	35.42847 mph
t	2	
d	2.45	
a	0 (gradient)	

SSD = 82.1 m **Vis required = 84.5 m**

Note 1: Above 60kph calculation shows DESIRABLE MINIMUM SSD
