

Planning application comment was submitted on the **11 August 2024 17:24 PM**

The following is a comment on application **P241582/F** by **Peter Antonius**

Nature of feedback: Objecting to the application

Comment: 1. Warren Lane is far too steep and narrow to accommodate the huge earthworks required to create the proposed entrance. The earthworks will create steep adjacent banks to the new access and further surface water run off adding to an already problematic drainage issue in the lane. The 'porous surface' specified does not say what it actually is. Any granular surface material will undoubtedly migrate towards the lane causing potentially hazardous skidding by vehicles slowing downhill.

2.The removal of the established ancient hedgerow line needs also be to be considered.

3.There is already perfectly good access to the field.

4.The size of machinery shown on the application seems totally unjustified for the size of the plot and turning in and out would be problematic given the narrowness of the lane

5.It will also leave a huge scar on the pastureland
