**Subject:** 222625 - Planning application comment was submitted

The following is a comment on application **P222625/N** by '**Matthew Fellows**'

**Nature of feedback:** objecting\_to\_the\_application

**Comment:**

This application (P222625/N Retention of slurry tank lagoon for the storage of dirty water only) is not new (as purported throughout the application including the repeated use of the word 'proposed') but Retrospective. This development was completed in December 2020 without planning consent.

The first application for this development (P192789/N Provision of digestate store) was 'Withdrawn' on 28 May 2020.

A subsequent application for this development (P203189/N Provision of digestate store) was 'Refused' on 28 January 2021.

This development is subject to an 'Enforcement Notice' issued on 20 October 2021 and effective 22 November 2021.

This application is not therefore for the 'Retention of slurry tank lagoon' but a Retrospective application for the 'Provision of a digestate store' which it is now proposed will be used for dirty water only. The storage of dirty water, digestate or any other commercial bi-product would appear semantic and not solely in the purview of the Planning Authority, but a joint responsibility with the Environment Agency.

This Retrospective application only differs from those previously submitted and Withdrawn and/or Refused in the developments' usage and not the development itself. It takes little or no account of the reasons for previous refusal or the observations of the consultee's engaged as a result of the refused application or the extant Enforcement Notice.

I strongly object to this application for the reasons identified above and which are borne out by the previous Refusal and associated Enforcement Notice. The continued growth of this site poses a significant risk to the wellbeing of the environment and its' residents.
