Russell

I thank you for your e-mail below and I apologise for not responding earlier.

I worked with the Environment Agency on this application both in terms of meeting with the proposed developer's agent / designer and with studying the proposals. This allowed for both a consistent approach and a means of maximising our expertise and avoided duplication of effort. Therefore there has been a joint approach to this site such that my comments are the same as those of the Environment Agency.

Regards

Martin

I still don't appear to have received your comments on the above planning application submitted in July.

Please can have your comments by the end of this week at the latest.

Many thanks

Russell
