Subject: Planning application 223375 - Ramsden Coppice

Good morning Simon,

I work for the Private water supply team in EH. We have recently been sent the new weekly planning applications and we have been looking through them to see if any may have an impact on the PWS's in our area. The above application is noted as an off-grid development and notes that one shower will be provided by grey water. I wondered if it was possible for the applicant to obtain further information on how this was to be provided and also how a potable drinking water supply was to be provided for the site?

Kind regards

Gill Armitage
