Heritage Statement

Willow Cottage comprises a number of separate building structures linked together. Running parallel to Back Lane and adjacent to it is a 2 bay, two storey traditional timber framed structure that has developed generically over the centuries. It is believed to be 18th Century but almost certainly has earlier origins. Adjacent, set back from the road, and at 90° to the earlier structure, is a 1950's single storey section, and to the rear a modern section completed in 2008 - also single storey.

The pitched roofs are covered with machine made clay tiles, whilst the flat roofed sections appear to be modern roofing felts.

The property has no specific historic interest but has been Listed for its group type.

Photographs of the property are attached.
