

Planning application comment was submitted on the **15 November 2024 12:18 PM**

The following is a comment on application **P222728/N** by **Hannah Graham**

Nature of feedback: Objecting to the application

Comment: The technology quoted as removing phosphates and nitrates is, as yet, untested.

The release of gases from the proposed AD plant, and additional gas and noise pollution produced by the extreme amounts of additional traffic, will have a devastating effect on the local environment for both humans and animals. The risk of toxic spills as tracked by the UK's Environment Agency has seen a rise of over 50%, year on year, of serious pollution incidents which would be catastrophic for an already struggling River Wye.
