

Technical Note 1

Project Number: T24606

Project: STW Ledbury

Title: Speed Survey Data and Traffic Generation

Date: 25th November 2024

Prepared By: James Parker

Floor 1B
4 Temple Row
Birmingham
B2 5HG

Background

- 1.1 Hub Transport Planning Ltd has been commissioned by Severn Trent Water (STW) to provide access advice for a proposed extension to their existing works site at Fromes Hill, Ledbury, on land to the north of the A4103.
- 1.2 The application site comprises existing agricultural land with some tree coverage, with access taken from an existing shared farm track that connects with the A4103 some 120m south of the site.
- 1.3 This technical note has been prepared following a consultation response from the local highway authority, Herefordshire Council (HC), dated 19th September 2024, within which they requested the following:
 - Please provide details of vehicle movements to the site, frequency, type and direction of travel.
 - Please provide existing visibility splays and a full 7 days speed survey with the 85th %ile speed.
- 1.4 The information contained in this note address the request above.

STW Traffic Movements

- 1.5 STW have confirmed that during the construction of the expanded facility, the traffic movements to the site are expected to comprise the following:
 - Site Operations = 1 to 2 vans per day during working hours (07:30 to 15:30);
 - Tanker Operations = 1 tanker collection per week;
 - Maintenance = limited movements (ad hoc, only when needed), but 24/7 access.
- 1.6 STW have also confirmed that, once the works are complete, there will only be an occasional maintenance visit needed to the site, essentially to either undertake routine maintenance or fix any issues that arise; as a very worst case, the site might generate one vehicle trip per month, but more likely one vehicle trip every three months or so.
- 1.7 As such, it is clear from the above that the proposed vehicle movements associated with the STW pumping station will be negligible.
- 1.8 The one STW tanker trip every three months, or indeed one per month as a very worst-case assessment, will be imperceptible to existing users of the local and wider highway network.

Technical Note 1

- 1.9 In respect of the direction of travel, STW have confirmed that trips will most likely all arrive from Worcester (from the northeast) to Fromes Hill, and then depart to the northeast when the visit is complete, i.e. a single right-turn in, followed by a single left-turn out.

ATC Speed Survey Data

- 1.10 We commissioned an ATC speed survey on the A4103 in the vicinity of the site access junction between Saturday 9th and Friday 15th November 2024.
- 1.11 The data is provided as **Appendix A** to this note.
- 1.12 The data demonstrates that the 85th percentile approach speeds along the A4103 are 43.2mph eastbound and 45.9mph westbound; weather data indicates that the week of the survey was dry, thus no adjustment is required (in line with DMRB CA 185).

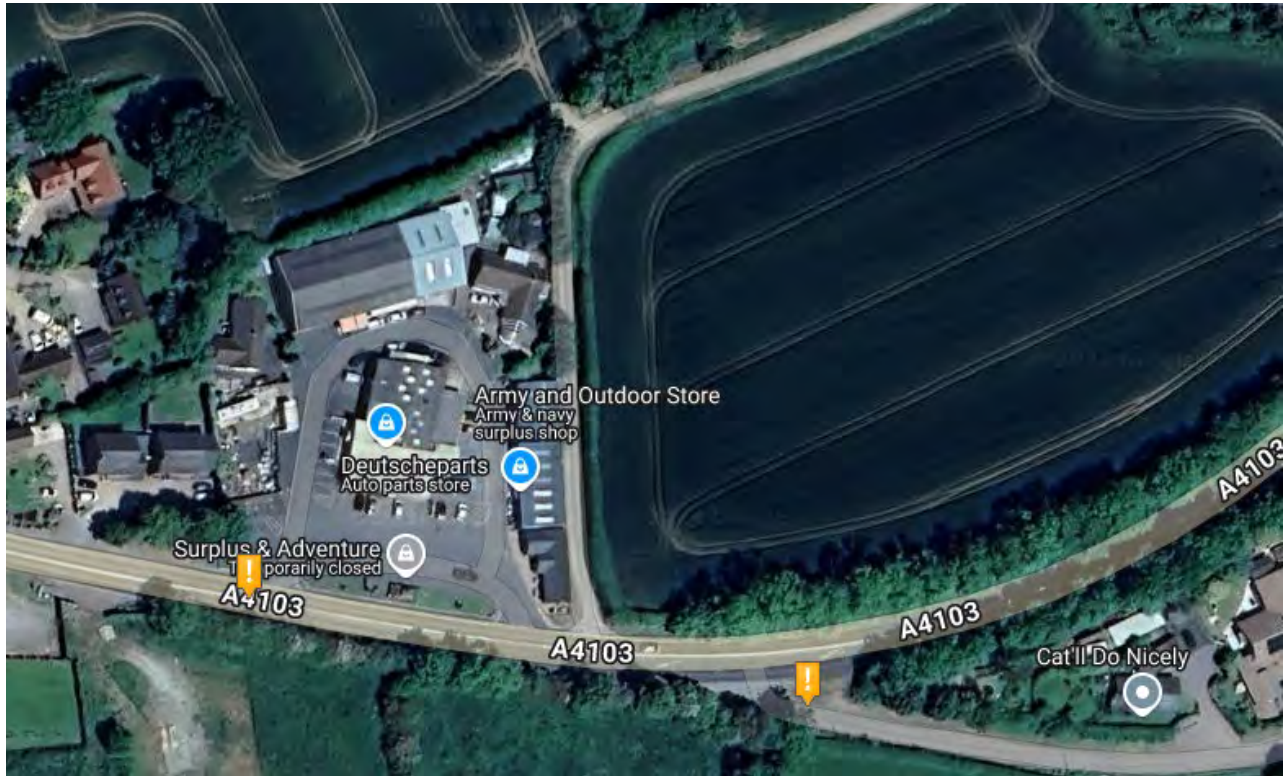

Existing Visibility Splays

- 1.13 The existing visibility splays at the site access with the A4103 are shown on **drawing T24606.001**.
- 1.14 The splays available at the junction are 2.4m x 43m to the nearside kerb to the west, and 2.4m x 46m to the nearside kerb to the east, or 2.4m x 61m to the offside climbing lane of the westbound carriageway on the A4103 (there are double white lines prohibiting overtaking).

Summary

- 1.15 It is clear that the impact of the site in traffic terms will be negligible, with just a single vehicle movement every month at most, and more likely one movement every three months.
- 1.16 HC also requested details of the existing visibility splays available at the access with the A4103 and these have been shown on the enclosed drawing.
- 1.17 In terms of the potential impact on the highway network, the STW facility is already present and takes access from the existing junction with the A4103; the expanded facility, once constructed, will result in a negligible number of vehicle movements to/from the site (indeed, similar to the current site).
- 1.18 It is worth highlighting that the highway safety record in the vicinity of the site is excellent, with only two slight injury accidents at the junctions adjacent or opposite in the 24-year period between 1999 and 2022 (inclusive), as shown by the screenshot from the Crashmap website (overleaf):

Technical Note 1

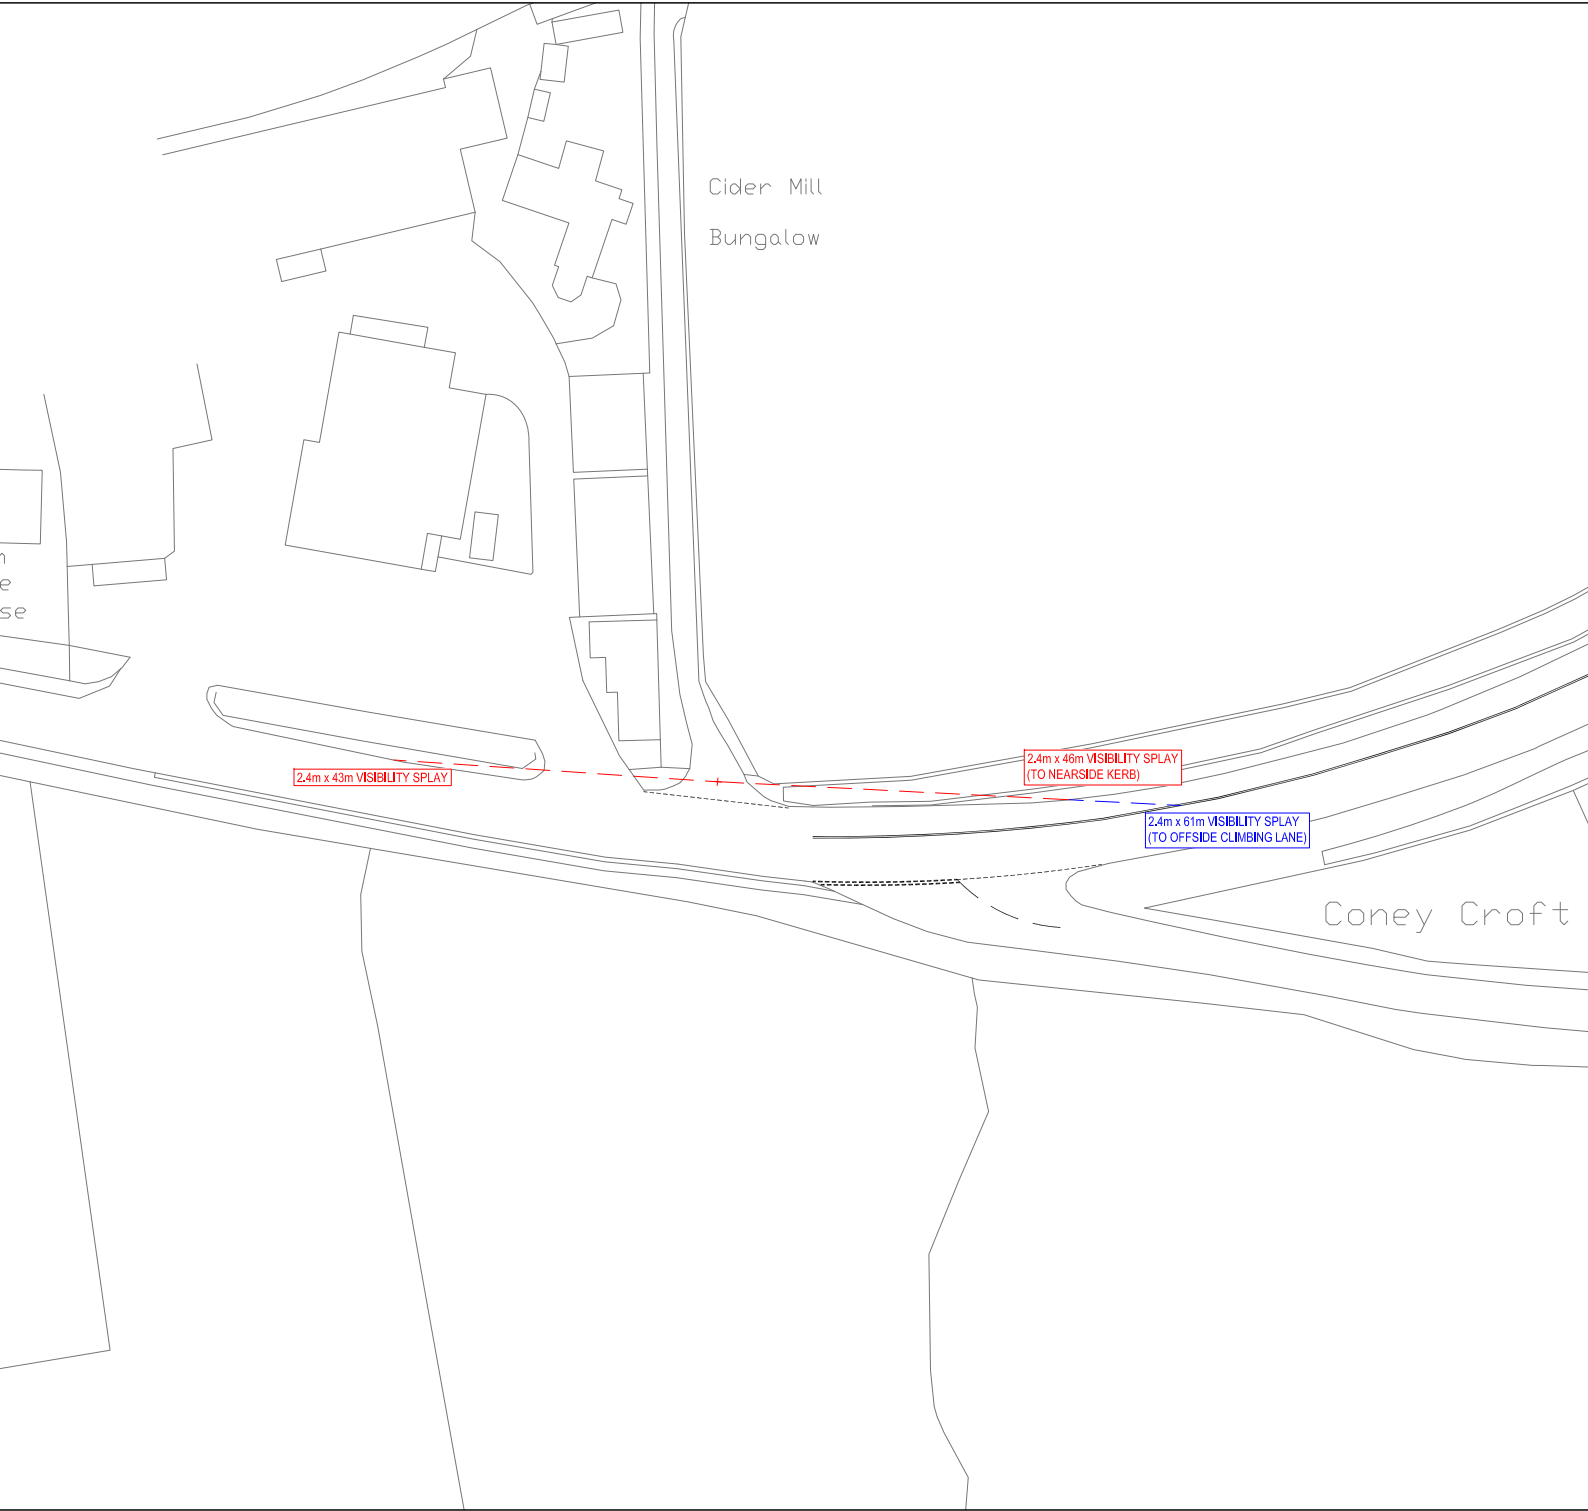

(Source: Crashmap.co.uk)

- 1.19 Therefore, given the traffic generation associated with the proposal, it is clear that the impact will also be negligible in respect of highway safety.

Technical Note 1

Drawings

- 1. THIS DRAWING IS NOT TO BE SCALED FOR CONSTRUCTION PURPOSES.
- 2. THE CONTRACTOR SHALL CHECK ALL DIMENSIONS AND LEVELS ON SITE.
