The following is a comment on application **P230173/F** by **Robert Selmes**

Nature of feedback: Submitting a general comment

Comment: No additional observations to our previous response which still stand. Many other responders appear to concur with our view that this development will only increase the usage of the A40 by walkers and cyclists. There is nothing in the proposal which would reduce the risk and discomfort caused by close proximity to the heavy and often fast moving traffic in all weathers.

Infrastructure from section 106 to consider: In the absence of a new route to the village amenities available for pedestrians and cyclists, measures to improve the safety of the pavements and crossing points between the development and the village should be a priority.
