Solar

10 Watt Solar Panel

Price £995.95

Quantity

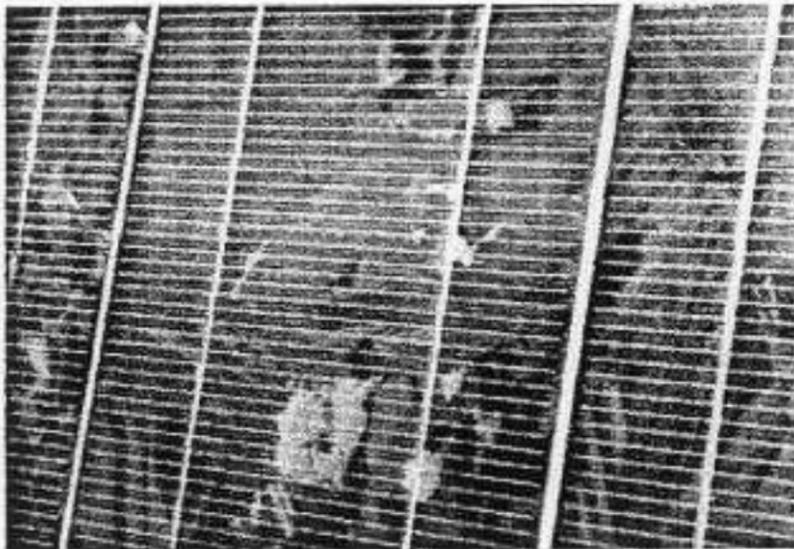

Solar Home Power Station – SDK001 – RRP £995.95

This kit is the starting point for achieving power self sufficiency in a home, business, holiday home, or anywhere that may be subject to power cuts and to insulate the user from future energy price rises.

The kit contains all the necessary parts to be producing your own power within a few hours.

The solar panel must be located outside and is supplied with a robust aluminium stand either in the garden or on a flat roof (the stand supports the solar panel at the optimum angle). The supplied cable then runs from the solar panel and connects directly into the waterproof battery box which contains a high performance 85Ah battery and a charge controller. The battery output cable runs from the battery box to the building and is then connected to the supplied power inverter. The inverter has a UK mains socket where a multi gang extension cable (not supplied) can be attached to run your electrical appliances.

The kit will power most household electrical devices such as the following:
CD player, TV, video, DVD, satellite box, gaming stations, lap top computer, desk top computer, mobile phone charger, desk lamp, table lamp, toaster, coffee maker, food mixer, power pump/fountain, electric lawnmower, garden lights etc etc.

Contents

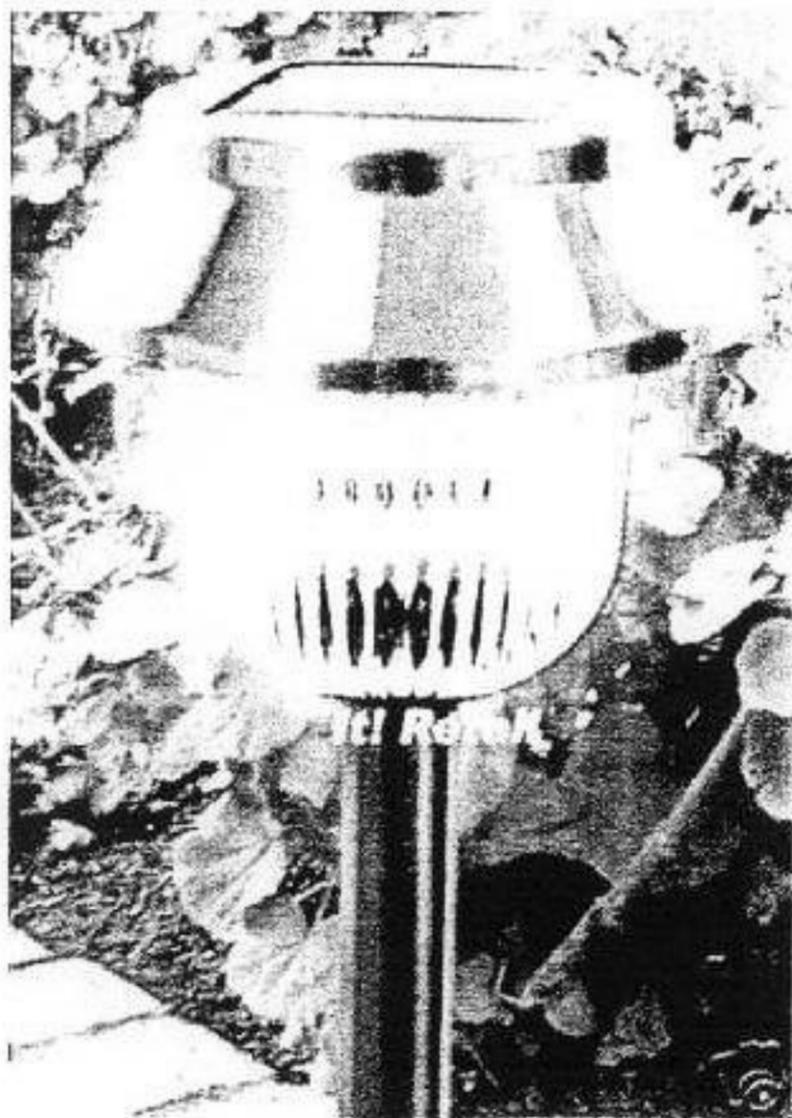

- 1 x STP080 – 80w solar panel
- 1 x 85Ah Deep Cycle Battery
- 1 x INV1000 - 1000Watt Inverter
- 1 x Waterproof Battery Box
- 1 x STSPR10 – 12Ah Charge Controller
- 1 x Aluminium solar panel stand
- 1 x 20m Cable bundle
- 1 x Power RCD Socket
- 1 x Connectors, fuses and terminals
- 1 x Detailed user manual
