The following is a comment on application '**P201219/F**' by '**Philip Tyas**'

Nature of feedback: Objecting to the application

Comment:

My major objection to this planning application revolves around additional traffic generation in the area and its proximity to the local school entrance. Road access- our village over the past years has seen a significant amount of new building and as a result the current main village road is unable to cope with the increased traffic and a number of accidents have taken place on the main Llangrove road due to increased volume and poor repair.

Infrastructure - Very little in the way of infrastructure has been improved in the village as a result of all the new builds and which often results in overflowing drains, and increased traffic in and out of the village.

Access - the proposed road to service this new build will "cut" across the only access to the village school entrance, which will not only cause a significant increase in danger to the local school children, and their families, but will also increase traffic flow at peak times.

I am uncertain how this new build will fit in with local, strategic, regional and national planning policies for the area but surely this village has seen more than its fair share of modern expensive building taking over a village which is unable to cope with all of the new planned developments.

Their contact details are as follows:

First name: Philip

Last name: Tyas

Telephone: [Response - Telephone]

Email: [REDACTED]

Postcode: HR9 6EY

Address: Chapel Grove

Llangrove

Ross On Wye

Herefordshire

Infrastructure from Section 106 to consider: Llangrove road to be improved to reduce congestion and improve traffic flow while reducing accident risk

Re routing of the proposed service road away from the school

Improvements to current infrastructure
