

Planning application comment was submitted on the **12 April 2025 09:29 AM**

The following is a comment on application **P222728/N** by **David Gillam**

**Nature of feedback: Objecting to the application**

---

**Comment:** Objection to Planning Application P222728/N

I am writing to reaffirm my objection to this Planning Application following the applicant's recent submissions. I do not believe that the copious additional documents in any way address my previous concerns.

I will not take up your time restating our objections. Rather, I will simply draw your attention to a highly significant development since our earlier objection.

I am sure you are fully aware of this but in any case, we note that on Page 9 of 15 of the In-Combination Aerial Emissions Assessment dated 23rd January 2025 there is a statement that 'digestate spreading is not controlled by planning and cannot be measured'. Following the judgement in the NFUs challenge to Herefordshire's MWLP I believe that this statement is now out of date as the digestate is now defined as waste. Therefore, as an absolute minimum, this development requires fully addressing by the applicant. Therefore, in summary, as before this application must not be allowed to proceed as it remains the wrong technology in the wrong place.
