Klargester BioDisc

Klargester BioDisc is Klargesters premier sewage treatment plant and offers a high performance, low maintenance system producing effluent which meets the rigorous quality standards demanded by the Environmental Agency. It is the only domestic treatment plant using a Rotating Biological Contactor (RBC). Operating costs are minimal, with an extremely quiet and reliable low power electric motor. Biodisc uses rotating discs as a medium for supporting bacteria which carry out the aerobic treatment process. Primary and final settlement are contained within the unit which also has a totally unique flow management system to provide optimum performance under all circumstances. The 2000 Building Regulations require that soakaway overload be avoided. BioDisc flow management uniquely achieves this.

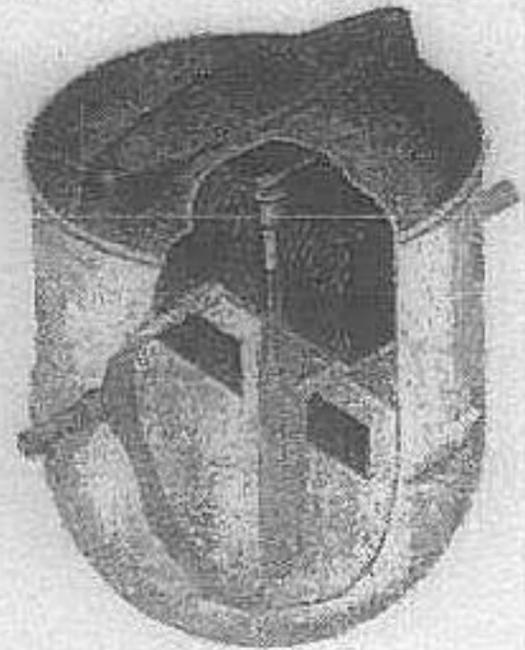

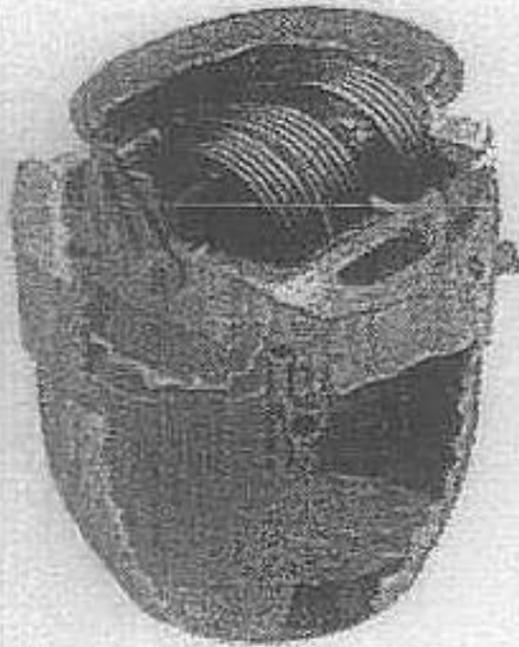

Klargester BioDisc Single Home: BA

Klargester AirFlow

The Klargester AirFlow range of packaged sewage treatment plants is available as standard or high level nitrification plants a development of the well proven aerobic biological process for purification of sewage and waste water. See [Legislation](#) information regarding regulations.

Klargester AirFlow Single Home: AF1

SW07/1010/F

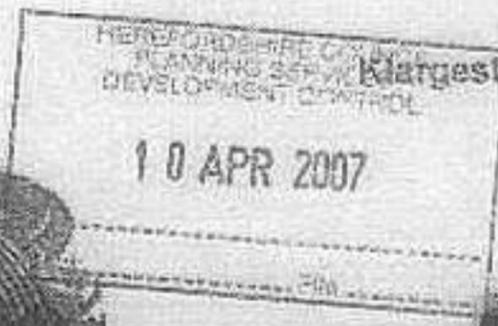

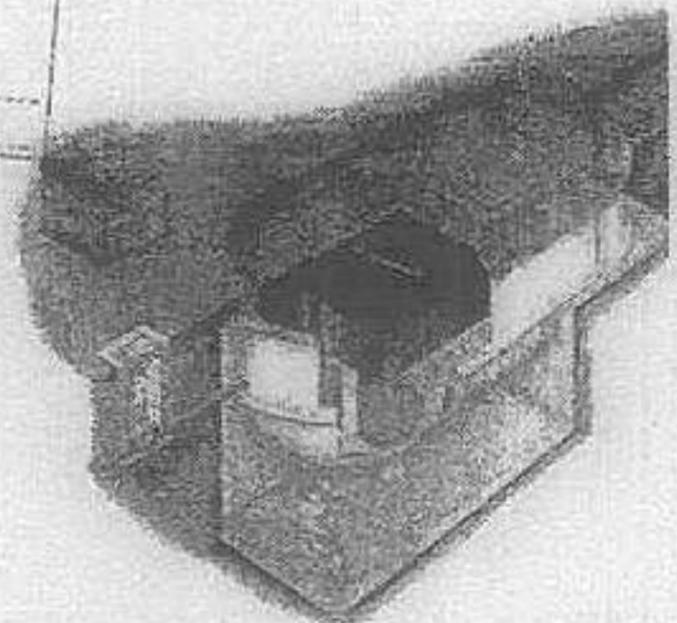

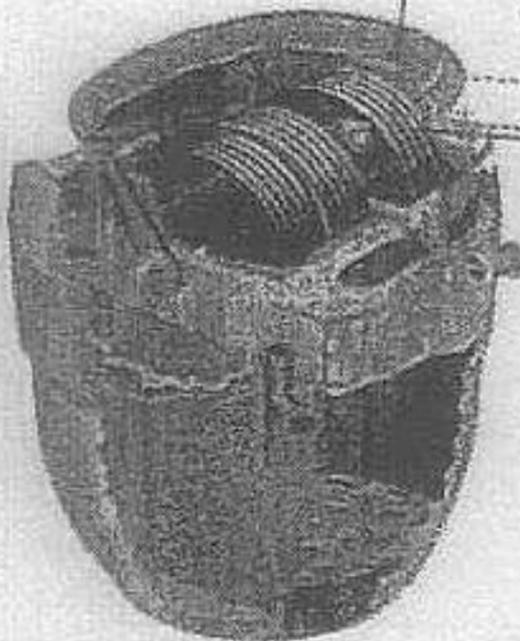

- Suitable for individual properties with maximum of 6 full time occupants
- BBA/BA certification
- Easy to install and maintain
- Quiet and odour free
- Low running costs
- Annual desludge
- 3 drain invert level options
- Many thousands of successful installations worldwide

- Below ground installation
- Ideal for individual houses, small developments, office environment
- No mechanical or electrical components
- Quiet in operation
- Low running costs
- Hydraulic surge control
- Manufactured under the quality procedures of ISO 9002

Klargester BioDisc: BB - BC

Klargester AirFlow: AF2 - AF3

- Suitable for individual houses, small developments and small office schemes
- Nitrification units available where regulations require ammonia removal

- Ideal for small housing estates, camping sites, sites, public houses
- Efficient air blower is quiet and ensures low run maintenance costs
- Casing construction to BS4394 (1987) in GRP Reinforced Plastic
- Manufactured under the quality procedures of ISO 9002

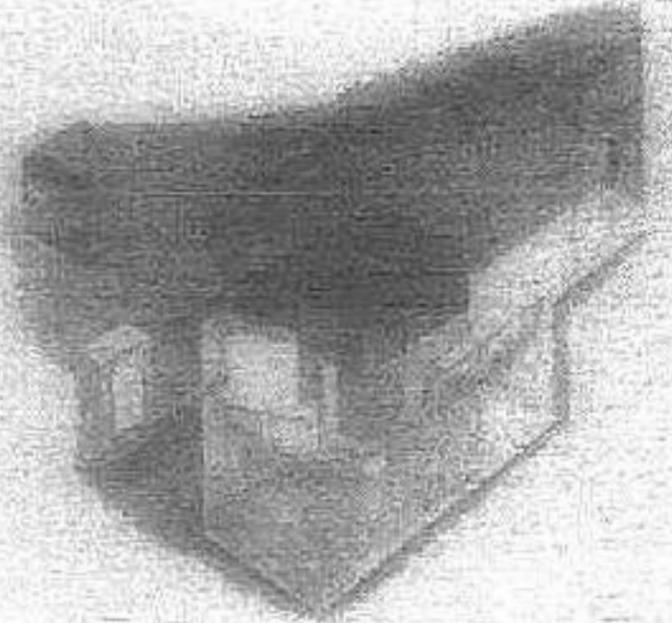

Klargester BioDisc: BD - BG

Klargester AirFlow: AF4 - AF7

SW07/1010/F

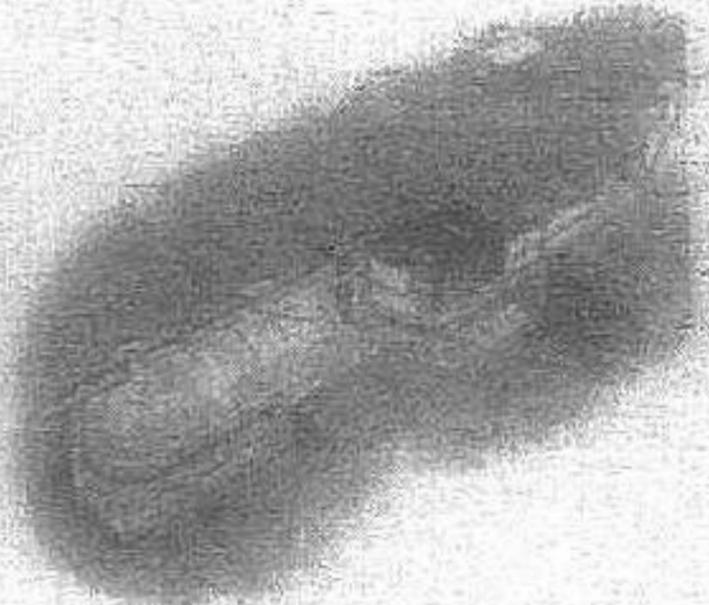

- Suitable for residential developments, camping sites, leisure developments and commercial schemes
- Nitrification models available where regulations require ammonia removal
- Low profile covers to minimise visual impact

- Ideal for housing estates, camping sites, schools
- Efficient air blower is quiet and requires low power and maintenance costs
- Casing construction to BS 5911 (1997) or BS 5912 (Reinforced Plastic)
- Manufactured under the quality procedures of ISO 9002

Klargester AirFlow: AF8 - AF10

- Ideal for housing estates, camping sites, schools, restaurants
- Efficient air blower is quiet and requires low power and maintenance costs
- Casing construction to BS 5911 (1997) or GRP (Glass Reinforced Plastic)
- Manufactured under the quality procedures of ISO 9002
