**Proposed five holiday chalets, Flood Risk Assessment.**

Due to increased demand it is proposed to construct five new holiday chalets on the site now reserved for touring caravans.

The level of the site is 126 metres, the ground level adjacent to these chalets is to be raised by 1.800m, the floor level being 128m; the floor level of the proposed chalets will match the existing chalets along the river.

The river adjacent to these chalets has been dredged clean and culverts have been constructed to carry flood water around the bridges on the site.

The original chalets were built in the year 1999, the flood water has not effected these buildings to date.

The extensions will not affect the existing roads, disabled access or landscaping.

Yours sincerely,

Philip Hammond.
