Subject: planning application 171532 OBJECT

Dear Sir ,

I wish to voice my objection to the Bloor Homes proposal 171532.

625 homes with only 1 access seems like they are building a ghetto, no facilities schools , retail premises, no infrastructure what are they trying to achieve ?

I live in Wellington Heath and the road is busy enough at times with another 600 + cars it will become dangerous and I do not want to see our Village become a rat trap for people trying to avoid the chaos this will bring.

At least ensure that the traffic that will use the Hereford road can access the Hereford road direct, what are Bloor homes so scared of, why is the Viaduct such a barrier to them?

Why is a second entrance /exit for only emergency vehicles who will police that and what happens when the Key holder fails ?

This seems a poorly thought out application, or one that is designed to maximise builders profits at the expense of the home owners and the surrounding communities.

I OBJECT very strongly to this application, and hope you will give it your due consideration.

Regards

Tony Cooke
