Hello Jenny,

The Biodisc is located in the field to the east of the site. I attach site plan which shows its location.

For the infiltration rate, I have never been asked this question before. No infiltration test or percolation test or the like has been carried out in this area as yet. Is this required for such an application and in this instance?

Regards,

Ian Phillips.

Good Morning Ian,

Many thanks for sending the drainage information through.

Please can you confirm where the foul water discharge from the main house discharges too?

Please can you confirm the infiltration rate of the ground in the area proposed for the soakaway?

Kind regards,

Jenny

Jennifer Allen

Hello Joshua,

The rainwater will discharge into a new traditional soakaway.
The foul water will have a simple run to connect into an existing foul water manhole of the main house.

I attach revised drawing showing these details.

I hope this is adequate, but if you need any more information, please let me know.

Regards,

Ian Phillips.
