Subject: additionalaccessstonorthviaductdevelopment.

Dear.Mr.Brace, We both strongly object to the above additional access. The emergency access also off the Bromyard Rd. and the use of three-way traffic signalling are bound in our opinion to greatly increase the logjam and backflow of traffic at the roundabout approaching the Hereford Rd. and railway station. We have previously objected to the building of the 2 roundabouts.

As residents of Wellington Heath we know our village will be used as rat- run for the many who wish to avoid the long tail backs at the traffic lights.Our narrow lanes will not cope with this.

We wish you to make public the views of your planning dept. on these serious issues and also any travel\road use analysis you must have received on these matters; not those considered acceptable to the developers.

Since the early stages of this development we have had very serious reservations concerning the whole process and the way you have handled it.

Yours sincerely, Brian and Christine Speakman.
