Philip,

I have done some more work on Mr Williams application.

I have carried out noise monitoring at a similar installation at a farm in Bridgnorth.

I no longer have concerns regarding noise from the proposed use and I withdraw my earlier comments.

I have no objection to the development proceeding. Mr Williams is a little unhappy; he blames us for having to withdraw an earlier and delays in getting his project off the ground.

It was a poor application and... I have saved him the cost of a consultant!.

In the circumstances, it may be diplomatic for his application to
Proceed asap!

Regards

Richard
