Dear Sir, Would you please consider my planning application for a block of three stables to house, Three horses and a foal, The building would also incorporate a tack room and food storage room.

It is my intention to build the stables for my use to house the horses using locally sourced materials where possible and incorporate stone remains from the original building that is on the land .

I have enclosed the findings of the ecological survey , as requested following my pre-planning application , in with the plans for full planning permission.

I hope these requests will meet your approval?

Regards R F Williams.
