

Planning application comment was submitted on the **11 August 2024 21:10 PM**

The following is a comment on application **P241551/N** by **Keah Jones**

Nature of feedback: Objecting to the application

Comment: I object to the planning proposal of such a development. I personally use the road to visit close family members who reside opposite the proposed development site. The development would result in increased air and noise pollution and use of HGVs. The main road is already a dangerous high speed road situated on a blind bend that has been the cause of multiple accidents. The extra traffic and use of HGVs would only increase the risk of danger and accidents and I do not wish for this when I travel with a baby in the car. The air pollution could result in health issues which again I do not wish for my elderly family members or baby who is at the property quite regularly. The development would not be safe for residents, business owners, employees or visitors to businesses. Moreover, the development would cause disruption to the surrounding green space, agriculture, rivers and animals near by. Neighbouring businesses would also be negatively affected by the reasons already stated above.
