Hi Phillip

Yes. I'm happy with this now so No objection. It's interesting that there is an exceedance at canopy level but I am happy that installation of better extraction will result in a betterment. OK?

Regards

Rob

Rob

This email is relevant to the previous one I have just sent to you.

I assume you are ok now with this. If please confirm .Email will suffice.

Thanks

PM

Subject: Bromtrees Hall, Stoke Lacy

Philip

Please find enclosed a copy of the ammonia deposition report for Bromtrees Hall as requested by Rob Widdicombe.

Due to the close proximity of the ancient woodland, the proposal cannot comply with the ecologists requirements. The existing farm is already well over the threshold. As part of the proposed development we are proposing improvement to the ventilation system of the existing buildings, and this improvement improves dispersal of ammonia. The results shown in the report demonstrate that the expansion of the site is offset by the improvements to the ventilation of the existing sheds. The result is a marginal improvement to ammonia deposition over Bromtrees coppice.

Regards

Ian.
