Subject: 240568/F - Proposed Muck Store - Field North of A4103 Big Dents Field Whitestone Herefordshire HR1 3SG

Good afternoon, Rebecca,

Further to recent correspondence I know attach:

- 1) A summary response to the points raised by the Council.
- 2) Related appendices &
- 3) Nutrient Management Plan.

Separately, I will send a Manure Management Plan and related appendices.

The summary response explains the rationale for the siting of the building and the measures that will be undertaken to ensure appropriate treatment of dirty and surface water runoff. It is important to note that the storage of manure within local fields is ongoing, with unprotected manure being exposed to the elements and hence more prone to enter the riverine environment through runoff and leaching into groundwater.

The appendices include a body of support for the introduction of manure stores, relating partnership working between key stakeholders [REDACTED]
[REDACTED]

The Nutrient Management Plan is overseen by the applicants in consultation with CXCS and is an extremely detailed and 'live' document recording the status of the soil upon the farming partnership's ground. It is imperative to the applicants for environmental and productivity reasons to ensure the proper management of their soils, as the NMP hopefully demonstrates.

I'd be grateful if you could confirm safe receipt in due course.

Kind regards

Ed
