Galeco STAL gutter system

When you build a house, you think not only about your children, but also about grandchildren. Therefore, we have just developed durable and robust solutions that ensure comfort and smile for many long years. The Galeco STAL gutter system is a guarantee of many years of satisfaction from the ideal purchase and... smile for rainy weather.

Advantages

Innovative gutter shape
preventing water overflow,
even during heavy rainfall.

Gutters and downpipes are covered with a film
which protects them against scratches during transport.

High durability of metal sheets
thanks to application of 4 protective layers which
provide protection against weather effects.

Steel gutter deeper
than other systems available on the market, guaranteeing higher
effectiveness of water channeling.

Lower cost of the system
thanks to seal corners made
of coated metal sheet.

Complete protection system for gutters and downpipes
film coating and inner gutter seam, guarantee top aesthetic
qualities and prevent scratches.

Convenient assembly of the system
the brackets are installed first; then, after installing upper aprons,
the gutters can be finally fixed.

The first universal corner on the market
adjustable, maximally shortening time and cost
of the gutter system installation.

Functional values

1. Fine look.
2. High mechanical strength.
3. High resistance to temperature differences.
4. 35-year warranty.
5. Top quality steel.
6. Ecological gutter coating materials.
7. Specially profiled hook with a high load resistance.
8. 70 mm wide gaskets.
9. Clamp or key installation system.
10. Joiner suspended on a bracket.
11. External corner with adjustable angle.

Capacity table

The table below specifies the capacities of individual gutter system elements. By comparing the table data with the roof area to be drained, you can select the most appropriate system for your building (the table data specify the maximum roof area that individual gutter systems are able to drain).

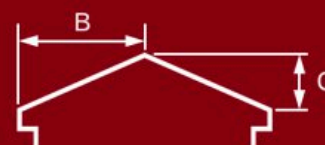

Downpipe positioning	Gutter type / downpipe size				
	120 / 90	135 / 90	135 / 100	150 / 100	150 / 120
	60 m ²	110 m ²	110 m ²	150 m ²	150 m ²
	120 m ²	220 m ²	220 m ²	300 m ²	300 m ²

Calculating Effective Roof Area (ERA):

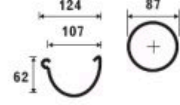

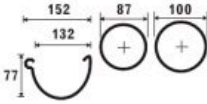

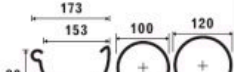

Roof area in sq. m = $(C/2 + B) \times \text{roof length}$.

If the design provides for the corners, increase ERA by:

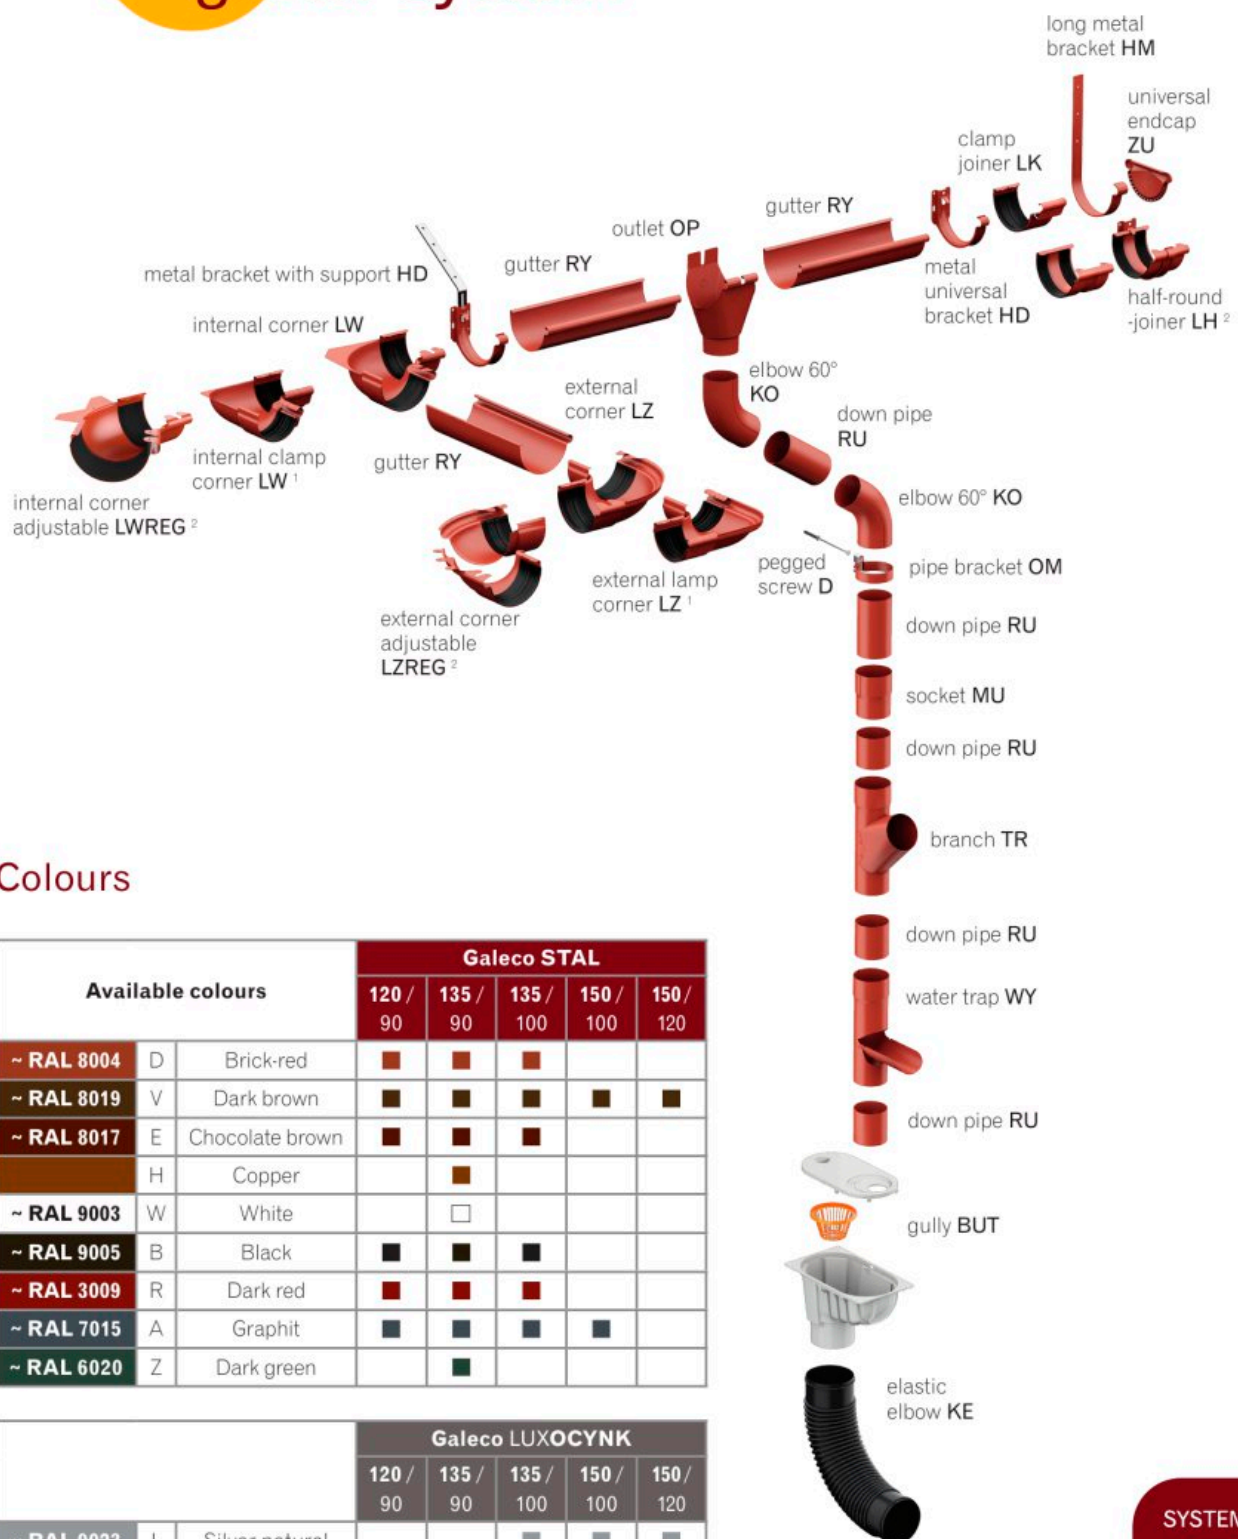

- a) 10% - installation of the corner up to 2 m from the outlet
- b) 5% - more than 2 m

Diameters and application

	 <p>surface area 55,5 cm²</p>	<p>Galeco STAL 120 is a gutter system designed for larger garages, sheds, small single-family houses, terraces and utility buildings; supplementing Galeco 135 system. The deep guttering profile has a capacity similar to the one of a steel gutter of 125 mm Scandinavian profile.</p>
	 <p>surface area 90,1 cm²</p>	<p>Galeco STAL 135 is a basic guttering system for single-family houses, residential buildings and small industrial facilities. The deep guttering profile has a capacity similar to the one of a steel gutter of 150 mm Scandinavian profile.</p>
		<p>The Galeco STAL 150 system is designed for discharging water from large uniform roof surfaces on industrial buildings and large</p>

2. Refers the STAL 135 system.

Galeco LUXOCYNK gutter system

Galeco has developed a new gutter system – Galeco LUXOCYNK. The new material is the most economical choice in Galeco's offer, which at the same time guarantees high quality of use.

Apart from traditional zinc coating, the Galeco LUXOCYNK is covered with a polymer coat and chrome, which form a permanent, solid compact coating, protecting the steel against corrosion.

The new system is available in size 135/100, 150/100 and 150/120, whereas its profile and long elements are similar with the proven Galeco STAL system.

Galeco Rainwater Technology

We are a designer, manufacturer and distributor of professional gutter systems.

With more than ten years of experience and presence in European markets, we guarantee to provide our customers with breakthrough, innovative and high quality solutions. We continuously reach new markets, by offering the systems highly appreciated by exacting customers.

Galeco is one of the most recognisable brands in its sector and the guarantee of the right choice. We are a reliable business partner who was trusted by national and foreign investors.

We ensure patented technologies, new generation innovative solutions and attention to every detail.

Welcome to **Galeco Rainwater Technology**.
