The following is a comment on application **P233094/F** by **Phillipa Richards**

Nature of feedback: Support the application

Comment: I support the application because from my own personal experience with my previous horse, i feel it is imperative that there should be someone on site that can aid a horse in distress asap, my old horse suffered from colic in the night at another yard and Carolyn was able hear her in distress and was able to prevent the symptoms from getting worse and stop my horse from being in pain, she did the same for my fathers old horse and they both lived comfortably for years after. There was another case with my fathers horse and I believe as a result of Carolyn not being able to live on site, she was unable to help relieve any pain caused and therefore the horse suffered hours of agony and the result was that he had to be put down!
I believe that for the well-being of the horses at the stables, there needs to be someone living on site to be able to respond to any distress calls, especially someone who has years of experience and knows exactly what to look out and listen for, what to do in different situations.
