The following is a objecting comment on application [P151184/N](#) by Sophie Glover:

"

Withington Group Parish Council

Planning Application No. 151184 Former Lugg Bridge Quarry, Eau Withington HR13LZ

The Withington Group Parish Council (WGPC) objects to the proposed development as a unnecessary and unwanted intrusion into the open countryside. As clearly stated in the application the former gravel deposits have been worked out and it was considered at the time of the original permission, granted on appeal, that a full restoration plan would be submitted and implemented. Such a plan should cover the whole site, including the working and storage areas. The plan would include proposals for nature conservation and enhancement and potential for public access. The WGPC has never been consulted on any comprehensive restoration plan. The importing of 'inert' recycling material is not connected with gravel extraction and the operation can take place either on demolition sites or on an industrial estate.

The continued use of crushing plant and loading and unloading will extend the noise intrusion into the quiet countryside. In addition the increase in vehicular movements will seriously impinge on any long term restoration plan for the whole area
