**Subject:** RE: Luston Planning Conditions 6 and 7

Hi David,

Regarding the discharge of condition 7, in addition to the topography survey results sent to you in my previous email (18<sup>th</sup> July), I have attached further information which we believe is also required to discharge this condition:

- WSP hydrological monitoring reports
- JN Bentley culvert design
- Outfall detail drawing
- WSP syphon design and supporting calcs
- Welsh Water design info

Please could you inform me as to whether the information sent is sufficient to discharge this condition?

Very many thanks,  
Ellie
