Subject: 214619 - Planning application comment was submitted

The following is a comment on application **P214619/F** by '**Jonathan Beech**'

Nature of feedback: objecting_to_the_application

Comment:

Although I, as everyone else, agree with the need for renewable and sustainable energy, the idea to use A1 agricultural land defeats the object. There are many other reasons to fault this application before any permission may be granted. The monies forthcoming for local use are below that offered by other schemes. The company may sell this scheme on, as may be their intention considering as a new company this is the only project they have. The details to connect to the national grid are not anywhere near agreement, but purely speculative. Much work needs to be done before this application is considered.
