Dear Emily

Regarding Condition 5. The brickwork of the old boiler and chimney have been removed.

This reveals areas of concealed stonework, with a small number of brick inserts and open sockets. These can be seen clearly on the attached record photographs.

There is some soot and minor loose material on the revealed surface and we would propose simply brushing down with a stiff bristle brush to remove anything that is loose.

There is no need for any repairs or alterations.

The revealed masonry will remain visible on completion of the works.

I would be pleased for you to pass this on to the conservation officer for confirmation of whether this information will allow discharge of the condition or whether anything else is required.

I look forward to hearing from you.

Regards

Richard Lamb
